Common & Glossy Buckthorn

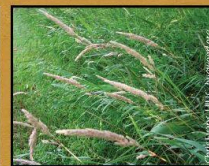

Multiflora Rose

Japanese Barberry

Tree of Heaven

Reed Canary Grass

Russian & Autumn Olive

Burning Bush

Black Locust

Callery Pear

It is critical for landowners to learn the plants that are invasive in their region. Once invasive plants gain a foothold, it can be very difficult to eradicate them. We have listed here some of the worst offenders in the Midwest.

More information about invasive plants of the forest can be found online through the websites of the USDA Forest Service, Iowa Department of Natural Resources and Illinois Department of Natural Resources.

Join Trees Forever on its mission to plant and care for trees and the environment by empowering people, building community and promoting stewardship.
